## Research Interests

---

- ❖ Text Analysis- anything that is represented textual, e.g., source code of a program, natural language text, clinical text, etc.
- ❖ Computational Logic and Reasoning- both classical and probabilistic one
- ❖ Constraint Satisfaction Problems- especially from the practical perspective, i.e., by formulating and solving real-world problems such as the ones raised in software verification and using tools such as Z3

- ❖ Machine Learning Algorithms- classical and symbolic ones, reinforcement learning, and deep learning; moreover, enjoy thinking in-depth about ensemble learning methods
- ❖ Complexity Theory & Designing Algorithms- it is an old but lifelong appetite to someday work in depth on it
